Cisco 1700 Virtual Private Network Security Router Bundles

Introduction

Cisco Systems is pleased to announce the availability of new Cisco 1700 VPN security router bundles. To provide customers with an easy-to-order solution that meets their VPN networking and security needs, six VPN router bundles based on Cisco 1721, the award-winning Cisco 1751, and new Cisco 1760 modular access routers are available. These VPN bundles enable customers to order, using one part number, a Cisco VPN Router with all the necessary VPN components at a greatly reduced price compared to ordering each component separately.

To help customers take advantage of high-speed broadband ADSL connections, three bundles include an ADSL WAN interface card (WIC). Each VPN bundle can also include an additional WIC.

The new Cisco 1751 and 1760 VPN security bundles join the popular Cisco 1721 VPN bundles in offering customers the opportunity to select the ideal solution for their needs. The Cisco 1760 V3PN bundle combines all of the security and VPN features that are in the Cisco 1760 bundle, along with voice capabilities to deliver a multi-service security solution.

VPN Security Bundle Features and Benefits

VPNs can help companies reap benefits such as dramatically lowered WAN costs, improved global connectivity, and better reliability, while enabling capabilities such as secure extranet communications. Remote dial, Internet, intranet, and extranet access can all be consolidated over a single Internet WAN connection.

Product Number	Encryption	Max Tunnels	3DES Mbps 1518KB Packet	Memory (Flash/DRAM)	WIC

Summary

The Cisco 1721, 1751, 1760, and 1760 V3PN VPN Security bundles allow small and medium-sized businesses, enterprise customers, and service providers to easily deploy the Cisco 1700 Series routers as VPNs, to take advantage of new powerful VPN services available in these bundles.

The Cisco 1721, 1751, and 1760 bundles are a great complement to the Cisco 2600, 3600, 7100, and 7200 VPN bundles also available from Cisco, extending the range functionality and price points available to the VPN buyer.
